

PHYSICS 4A Winter 2009

Instructor: David Newton

Office: S11-a

Office phone: 864-8668

Email: newtondavid@fhda.edu

Web site URL: nebula.deanza.edu/~newton

Office hours: Monday 11:30-12:20 PM, Tuesday 2:30-3:20, Wednesday 10:30- 11:20, Thursday 11:30-12:20, Friday 10:00-10:50, and by appointment.

Final Exam: Friday, March 27th, 1:45- 3:45 am

Text: University Physics, by Young and Friedman, 12th edition.

Prerequisites: One year high school physics (C or better) or passing physics 50. Completion of Math 1A and concurrent enrollment in Math 1B.

The goal of this course is to cover the three conservation laws of classical mechanics: energy, momentum, and angular momentum. This includes the necessary details to successfully manipulate those laws: kinematics, vectors, problem solving techniques, mathematical techniques, and various definitions including Newton's universal law of gravitation and then a little about oscillations at the end of the course. In our text, this amounts to covering chapters 1 through 14, skipping chapter 13 though because fluids are covered in 4C at De Anza College.

NO make-up exams will be given without the PRIOR consent from the instructor (not just a prior notification to the instructor). Use the office phone number given above if you can't see me at school. If I'm not in my office, there is an answering machine at that number available for you to leave a message day or night (the phone may have to ring many times to answer). You must make arrangements to make-up the exam as soon as possible; if you wait too long (i.e., two or three days) to take your make-up exam, it is too late and you will not pass the class. One of the two exams can be made up but making up both exams is not allowed. Both exams are not allowed to be made up; only a make up exam on exam 1 or exam 2 is allowed..

No questions are allowed on the day of an exam regarding exam material. This does not apply to quizzes, just exams and the final. Any other type of questions on exam day are, of course, fine .

If you miss more than five lectures you may find yourself dropped from the class.

To pass the class you must take the final exam (in both lab and lecture) and all other exams.

A grade of zero points will be assigned to any work done if a student has been found cheating. An "incomplete" will only be assigned as a final course grade when a serious illness or some other severe problem is encountered by the student.

It is the responsibility of the student, not the instructor, to ensure being dropped or withdrawn from the course.

No exam score will be thrown out.

Cheat sheets or note cards will be not allowed during exams or quizzes. The exams will not require detailed memorization of many equations.

To receive your final grade you may send an e-mail request or give me a self-addressed stamped envelope at the end of the quarter. No grades will be posted.

Grading mistakes, or protests for exams and quizzes will only be considered when a written cover letter is submitted to your instructor with the exam or quiz in question. Your appeal will be considered, and the resultant decision will be final. No protests will be considered orally, this even includes simple addition errors.

Home work solutions are available from the instructor upon request and will also be discussed in office hours and lecture.

Your lowest lecture quiz score will be dropped.

Lab attendance is mandatory. A student with more than one unexcused absence will be dropped from the class.

You will be graded on the union of the information provided in the lecture and from the assigned text readings. The grades will be given on the traditional percentages:

A: 92-100%;

A-: 90-91%

B+: 88-89%

B: 82-87%;

B-: 80-81%

C+: 78-79%

C: 60-77%;

D: 50-60%;

F: lower than 50%.

Overall class scores may be curved to fit this pattern.

The grade distribution is as follows:

Lab 10%

Homework/Quizzes 10%

Exams (2 exams) 20% each

Final (comprehensive) 40%
